

BETHANY

FAMILY PET CLINIC

DEVOTED TO YOUR
PET'S WELL-BEING
EVERY DAY OF THE WEEK

WHO WE ARE

Our mission at Bethany Family Pet Clinic is to benefit the pets we care for and the pet owners we serve. We are dedicated to helping our animal patients live longer and healthier lives. We believe that our role in caring for the health of pets is vitally important and we take it very seriously. We respect and cherish the bond that owners have with their pets and we will always help support that bond.

We seek to understand and to pursue what makes a pet clinic function at a level of excellence that exceeds industry norms. We strive to be innovative in our approach to providing veterinary services. We intend to differentiate ourselves from competing hospitals by providing superior service and care.

WHAT TO EXPECT

When you arrive for your appointment, you will be greeted warmly, and we'll guide you into an examination room after you check in your pet. In most cases, one of our staff members will start by asking about your pet's medical history and the reason for your visit.

Then, one of our veterinarians will examine your pet, ask you further questions and then make recommendations. This is a great time to ask questions. Our veterinary team wants to make sure you understand every aspect of your pet's care.

Compassion. Care. Commitment.

AAHA Accreditation

AAHA accreditation means we are regularly, voluntarily evaluated on over 900 standards of care set forth by the AAHA. Our continued membership in AAHA shows we're dedicated to providing excellent veterinary medicine to your pets.

Cat Friendly Practice

Bethany Family Pet Clinic is proud to be a member of the American Association of Feline Practitioners' Cat Friendly Practice (CFP) program! Our goal as a Cat Friendly Practice is to make your cats feel comfortable and reduce stress as much as possible when they visit our clinic.

OUR SERVICES

LIFETIME CARE

Preventive care is your pet's first defense against illness and injury. Annual exams help by preventing, diagnosing and treating disease in its early stages, often before any noticeable symptoms begin.

DIAGNOSTIC CARE

We use advanced diagnostic equipment to diagnose and treat illness and disease. We use ultrasounds, endoscopies and digital radiographs along with our in-house laboratory to get full pictures of what's happening inside pets' bodies.

DERMATOLOGY

Your pet's skin and hair are good indicators of their overall health. Because of the many causes of skin abnormalities, diagnosing the problem can be complicated, and we'll work with you to figure out exactly what's ailing your pet.

INTEGRATIVE MEDICINE

Our holistic program incorporates the best of conventional, Western medicine with the best of Traditional Chinese Veterinary Medicine. This progressive strategy creates a complete health plan for your pet, helping them through immediate and acute health conditions, recovery and maintenance after they have returned to health.

ACUPUNCTURE

Acupuncture helps the body heal itself. This practice utilizes hair-thin needles to stimulate the body's nerve centers, improving blood circulation and releasing pain-relieving hormones.

VACCINATIONS

Vaccinations are the best weapons against many viral and bacterial infections, as they prevent deadly diseases like canine parvovirus and rabies.

DENTISTRY

We offer complete dental services, including routine cleanings, preventive care, X-rays, dental disease treatments and extractions of diseased and damaged teeth. Thorough dental care keeps dental disease and its complications at bay.

SURGERY

We are proud to offer state-of-the-art surgical facilities and equipment. Along with soft-tissue procedures and oral surgeries, we also perform most orthopedic surgical procedures that commonly occur in veterinary medicine, like CCL and fracture repairs.

BOARDING

Our guests enjoy safe, clean facilities under staff supervision and plenty of interaction with our delightful boarding staff.

NUTRITION

Pets need nutrient-rich diets to stay healthy. At Bethany Family Pet Clinic we are more than happy to help you select the right food for your pet.

ENDOSCOPY

Our endoscopy services allow us to visualize your pet's digestive track to help diagnose and treat a variety of conditions. This technology is extremely beneficial for biopsies and to help remove foreign bodies from the stomach without making an incision.
